QuickScreenShots is a simple but advanced tool that gives you the possibility to take screenshots and apply various image effects at the same time. It offers support for PNG format only. Portability advantages You can drop the program files anywhere on the disk or on a removable storage unit to easily launch QuickScreenShots on any computer. Just keep in mind that.NET Framework must be installed in order for the tool to work. It doesn't modify Windows registry settings, unlike most installers. Accessibility via the system tray At startup, the utility creates an icon in the taskbar notifications area for quick access. You can open its right-click menu or trigger hotkeys to capture the full screen, selected region, active window, or current video game you're playing. The images are automatically saved to file. You can modify the default directory and base file name, or set the app to

prompt you for these details at each captured snapshot. In addition, you can change the keyboard shortcuts assigned to each capture mode. Apply effects, draw objects, and configure settings Regarding image effects, it's possible to apply shadow and adjust its color, blur radius, offset and background color. Furthermore, you can draw lines, rectangles, ellipses, arrows and text, or make the image black and white. As far as general settings are concerned, you can ask the app to run at every Windows startup until further notice, start minimized, automatically copy the taken screenshot to the Clipboard, include or exclude the mouse cursor, enable sound alerts, hide messages in the notification area, and specify a screenshot delay. Evaluation and conclusion No error dialogs were shown in our tests, and the software application didn't hang or crash. It left a small footprint on system performance, using low CPU and memory. Too bad it doesn't offer support for additional file

types, apart from PNG. QuickScreenShots is a very simple utility that presents you with a large collection of predefined effects that can be applied to the saved screenshot images in order to make them easier to read. It

works as a portable counterpart of QuickScreenShots for Windows and supports PNG format only. (reviewed on: December 11, 2016)"They felt like they'd had to play catch up," said Coleman. "Nico's (Latos) third start (this year) of the season you almost couldn't get anything going offensively. You look back on the World Series in 2013 where the Padres did not have nearly enough offense to win. We had a chance in August where that could've been us. I'm glad they got on top of it." Jedd Gyorko and Travis Ishikawa hit back-to-back doubles to start the evening, and a sacrifice fly from Jesus Guzman made it 5-2 heading into the top of the eighth. Coleman took over for Latos in the bottom of the inning, and he was able to keep the score in a two-run hole for the rest of the frame. "He was getting ahead on them and they were caught looking," said Padres manager Bud Black. "They were swinging at a few first pitch balls that he was looking for. But the ball was coming in

pretty good. It was kind of like the story of the game last night. We had a great pitching effort and he threw the ball great. We had a lot of good at bats. We just couldn't get them across." With the score still knotted at six, the Padres turned to closer Brad Hand to protect their 3-1 lead. Once again, Hand was a savior and even admitted to having butterflies in the clubhouse ahead of the first pitch of the bottom of the ninth. Hand got two quick outs before Adam Cimber opened the inning with a single up the middle. A walk to Blake Treinen then loaded the bases with two outs. Hand fanned Yasmani Grandal for the second out to end the inning and preserve the 3-1 lead. "Kind of felt like it was coming, you know, I had that feeling," Hand said. "I just kept pounding the strike zone. It's pretty cool, and I think the guys believe in what I'm doing. I'm glad I could keep that lead." Coleman faced two more batters in the inning to finish the game. He
