This is not a cross-over. If you want a cross-over (extra elements added to RPG Maker games), the Fuzion is the best pack. If you want a "new", standalone RPG Maker game, RPG Maker MV Futuristic Cities: Robot Expansion is the right choice. This pack was designed to be used as a regular expansion for the Futuristic Cities tilesets and characters in the RPG Maker MV games. To play it standalone, you have to download the full Futuristic Cities set, not just the Robot Expansion pack. Futuristic Cities: Robot Expansion features: * 17 unique robots with numerous variations, of which 2 are human-looking robots (male and female) with several clothing options * 55 character sets in total * The robots were designed to cover different sizes, appearance (from cute to more boss-like) and their probable use for humans * 5 unique character sets with objects such as animated gears, a door, crosshairs and shoot animations * Each graphic comes in two possible styles: one with black outlines, the other one with colored outlines for less contrast. As there are also many variations for characters, there is a numeration system which is utilized throughout every resource pack. * You can freely choose the tileset/character you prefer to use for this expansion pack and switch between the two in the PSP when your RPG Maker game loads. * You can make further edits if you choose to edit the city graphics, characters, robots or even both * All resources can be used for any tileset and character combination. You can use them in any size, graphic or tileset you want. * Not just tilesets, but also the robots can be edited, scaled and replaced if you want. The basic robot sprites were designed with simple editing tools, but if you want to create something more elaborate, there are also the more detailed models. * You can always fully customize your city as you want. Add your favorite weapons, make new builds and so on! * You can make many things easier, especially for creating new characters. Many characters were designed with tools and edits which can save you a lot of time when creating a new one. * And that's not all... All sorts of animations can be added, like weapon attacks, shooting weapons, short animations, full on-screen animations or even cutscenes. Besides weapons, you can also edit the heads, faces, weapons, clothing and even the characters themselves. Every part of their appearance can be

Hell ... i wondered what it was like for a Game of Thrones character. But since i am not familiar with the story and characters to that level, i am here to say i dont know ... i did not enjoy this episode especially like i used to in the beginning ... the last i remember we were getting high on the Offret, Lyanna, Jon Snow, thats where i thought the show went right ... and this just came out wrong ... or maybe not. The first thing that tipped me off to a huge new character was the introduction of a weirdo looking guy with some fat rolls that said Boy Never Been Kissed ... wait ... what? oh wait he was 'UNCERTAIN' and then when i saw his name I realized: the easter bunny. the fat guy said Life was hard and he just needed something to make him feel better ... oh wait he was 'UNCERTAIN' i also knew he was 'UNCERTAIN' because of the way his eyes worked ... they move independently sometimes and then resume life like they had a break; and yet they are in a robotic motion. This kid he is why Lyanna Stark in the books is so amazing ... he did not exist until this episode and it was a really well done thing to bring him in ... and we shall get into that which we have on our homework sure this kid was who he claims to be ... he is delusional and a pathological liar because he is high on the Offret ... but i hope Game of Thrones is saying something about this kind of kid and how easily we are attracted to the monster. so Lyanna says that it was an especial day for her, it was the day she spoke her first words in the forest ... and there's about 8 episodes left in the first half of the season ... so why do i think this her last ditch attempt to get information and who is leading the hunt? i only think she is saying he is leading the hunt for THIS information ... and she talks about the importance of understanding the stories in the books ... how so many people wrongly influence books ... and this guy may be on the path to learning about the stories and what Baelish and his society is doing ... so yeah Lyanna has a plan ... so jonsays..... lyanna went and did more research ... she was led to this 'UNCERTAIN' character who is actually a painter of
